

Einstein

Push notification service for restaurant [Einstein](#).

Follow me on [Twitter](#) or [Github](#) for more info and updates.

How to use

Today's menu

4a74ff3b6bc87bbd4133543746b72e41c6d7029d

Push to phone

Einstein has build in support for [Prowl](#).

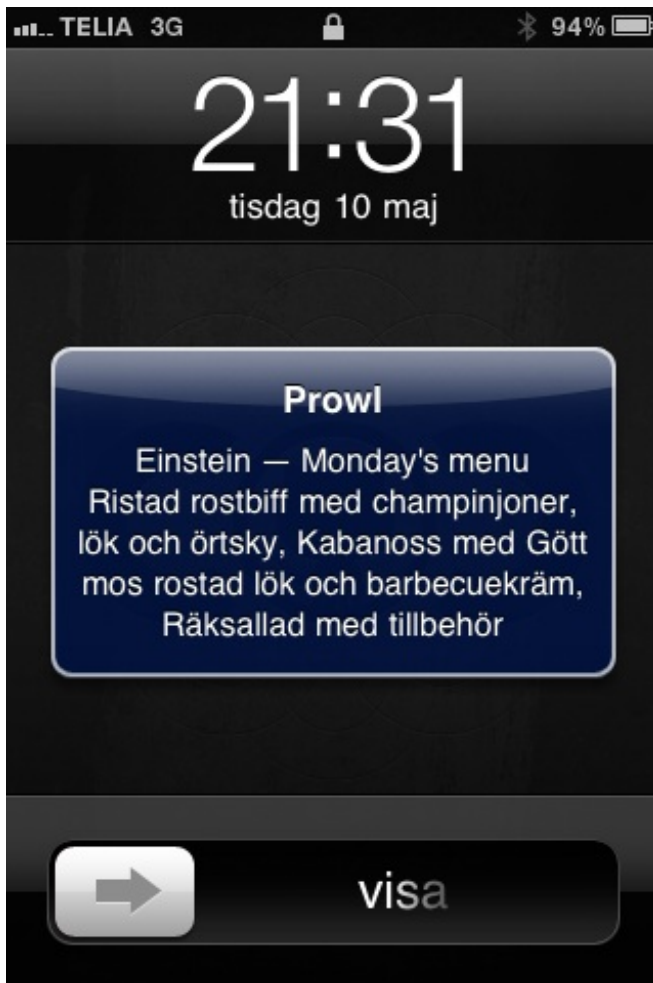

Pass you [api key](#) to the `menu_for` method to push the menu to you iPhone.

```
ruby Einstein.menu_for(:monday).push_to("6576aa9fa3fc3e18aca8da9914a166b3")
```

What is being returned?

`#menu_for` returns an array of strings containing each dish for the given day.

What is being push to the phone?

Real world example

Here is a real world example using [whenever](#).

This example will push *today's menu* directly to your iPhone at 11:45 AM.

- 1 . Install whenever. `gem install whenever` .
- 2 . Navigate to your application, run `wheneverize .` .
- 3 . Add these lines to your `config/schedule.rb` file.

```
```` rubyrequire "rubygems" require "einstein"
```

```
every 1.day, :at => "11:45 am" do runner 'Einstein.menufor(:today).pushto("6576aa9fa3fc3e18aca8da9914a166b3")'
end ````
```

- 4 . Create the cron task using `whenever` .
- 5 . Done!

## How to install

```
[sudo] gem install einstein
```

## Requirements

*Einstein* is tested in OS X 10.6.7 using Ruby 1.9.2.
